

The arrival of Sara Stedy at Samuel Broadbent House

Everybody was super excited about the “Sara Stedy” that was delivered. Staff received training on how to use this wonderful piece of equipment which enables immobile residents to be taken out to see a bit of sunlight during the lockdown.

It aids in limiting injury to the resident and brings great relief for staff.

Sara Stedy, from Arjo, is a mobile active lift with a safe working load of 182 kg (400lb).

It is intended to be operated on horizontal surfaces for transferring patients and residents in hospitals, nursing homes or other health care facilities.

This lift is intended to be used only by patients who have the ability to stand unaided or who can stand with minimal assistance.

The Sara Stedy may also be used as a supportive aid when elevating a patient for the purposes of changing wound dressings, incontinence pads or for personal cleansing.

Appreciation is extended to the MHA Board of Directors who generously contributed towards the health, comfort and happiness of our residents.
